

SWITZERLAND - Trademarks, Patents, Designs and all other related IP activities by ORITI PATENTS, Lugano, CH.

Oriti Patents

Oriti Patents, based in Lugano (CH), in the heart of Europe, may assist you in protecting your ideas, inventions and brands in Switzerland, which is a country with more than eight million inhabitants and at the forefront of innovation.

Oriti Patents delivers IP services in Switzerland starting from preliminary searches through filing of patents, trademarks and designs until their grant, maintenance and renewals of IP, validation of European patents in Switzerland and Liechtenstein, change of names and address, etc.

Oriti Patents, is also very active in pro-bono consultancy assisting for free Start-ups, Unemployed people and University students.

Also for free Oriti Patents has developed an electronic monitoring system and it is distributed on the internet (and soon also as an App) because is aware of the considerable importance of IP deadlines. This "web-tool" named IP Due Dates (www.ipduedates.com) allows a very simple and easy way to enter, manage and extract all types of IP deadlines and to be notified whenever desired. In this way, anywhere, anybody and at anytime in the World may be automatically informed by email involving, if desired, contemporary colleagues, staff and clients.

Oriti Patents has created other new easy web tools through an ERP (Enterprise Resource Planning) in order to make some IP services easier, immediate and transparent for clients 24/7 and where some IP activities may be entrusted with a few clicks and payments may be made with automatic e-invoices sent within 30 seconds. Tools like www.epvalidation.ch and www.tmrenewal.ch are already online.

During the covid-19 lockdown a first release of an App has been published as IP CH.
